Ligature Resistant TV Enclosure For Mental Health & Correctional Facilities.

ProEnc have been manufacturing ligature resistant protective TV enclosures since 2010, supplying leading healthcare facilities across the USA and Canada, with their protective TV enclosures for correctional and mental health facilities.

Ligature Resistant TV Enclosure

Checkout our current discounts

ProEnc's protective television enclosures, fully enclose the TV set and are made from heavy gauge sheet steel, fully welded for maximum strength and then powder coated in white for an aesthetically pleasing unit. The patent pending units all have 4 sloped sides preventing looping of material around the housing.

Each protective ligature resistant TV enclosure comes as standard fully assembled, and with the following components:

- * Internal VESA TV mount.
- * Cable access in rear.
- * 2 high security door locks.
- * Concealed quick release door hinges.
- * Thermostatic cooling system.
